KBC Asset Management NV is authorised in Belgium and regulated by the Financial Services and Markets Authority (FSMA).

Date of publication: 4 March 2024

**You are about to purchase a product that is not simple and may be difficult to understand.**

## What is this product?

### Type

This product is a fund. CSOB Buffer Jumper EUR 11 is a sub-fund of the open-ended investment company governed by Luxembourg law, Contribute Partners. This open-ended investment company does not fulfil the requirements of the UCITS Directive (\*).

### Term

Limited to 30 June 2027

### Objectives

Contribute Partners CSOB Buffer Jumper EUR 11 aims to deliver a possible return at maturity or if the fund is liquidated early (as described below), by investing in various assets, such as bonds and cash, and by concluding swaps. The initial subscription price is 10 Euro. The minimum subscription amount is 50000 euro. The initial subscription period runs from 12 April 2021 until 17 May 2021 (before 6 am CET).

The fund's return is linked to the performance of the EURO STOXX 50®-index.

The fund will be liquidated early when the value of the index is not lower than its initial value on an annual observation date. You will then receive a fixed capital gain of 4% per year that has elapsed, in addition to the initial subscription price.

There are 3 observation Values, calculated each year, from 2024 up to 2026.

If the fund is not liquidated early, the following will happen at maturity (30/06/2027):

- if the value of the index is not lower than its initial value, a fixed gain of 24% will be paid out, in addition to the initial subscription price.
- if the value of the index is lower than 100% of its initial value, but not lower than 60% the decline in the value of the index will not be taken into account. In such a scenario, you will receive the initial subscription price.
- if the value of the index is lower than 60% of its initial value, 100% of the decline will be deducted from the initial subscription price.

The EURO STOXX 50® comprises a selection of shares of euro-area companies.

The evolution of the index is calculated on the basis of average share prices over a specific period. The calculation of an average can have a positive or negative impact on the fund's return. It also ensures that share prices do not overly affect the return should they rise or fall significantly on certain days (for more details, see section 2 of the information concerning this sub-fund in the prospectus).

To achieve the return, the fund invests:

- in SPV\* notes, other bonds and debt instruments, deposits and/or cash. SPV notes are listed bonds issued by Special Purpose Vehicles managed by KBC Asset Management or one of its subsidiaries. The minimum credit rating\* that the bonds and other debt instruments have to meet is set out in the prospectus.
- and in swaps\* concluded with one or more prime counterparties.

The fund is denominated in Euro.

Orders for fund units are executed twice a month (for more details, see section 4 of the information concerning this sub-fund in the prospectus).

More details on how the fund works and on its composition can be found in section 2 of the information concerning this sub-fund in the prospectus.

### Practical information

The custodian of Contribute Partners is Brown Brothers Harriman (Luxembourg) S.C.A.

You can obtain a copy of the prospectus and the most recent annual and half-yearly report in English free of charge from any branch or agency of the financial service provider(s):

- Brown Brothers Harriman (Luxembourg) S.C.A.

or KBC Asset Management NV (Havenlaan 2, 1080 Brussels, Belgium) or via the following website: [www.kbc.be/kid](http://www.kbc.be/kid).

You can find the most recent net asset value\* at [www.kbc.be/retail/en/investments/net-asset-values/value.html](http://www.kbc.be/retail/en/investments/net-asset-values/value.html). You can read all other practical information at: [www.kbc.be/kid](http://www.kbc.be/kid).

This key information document describes CSOB Buffer Jumper EUR 11, a sub-fund of the open-ended investment company (sicav)\* under Luxembourg law Contribute Partners.

The prospectus and periodic reports cover all sub-funds of the open-ended investment company.

Each sub-fund of Contribute Partners should be considered as a separate entity. Your rights as an investor are restricted to the assets of the sub-fund. The obligations of each individual sub-fund are covered only by the assets of that sub-fund.

You may exchange your investment in units in this sub-fund for units in another sub-fund. You can find more information about this in section 11.4 of the prospectus.

## Intended retail investor

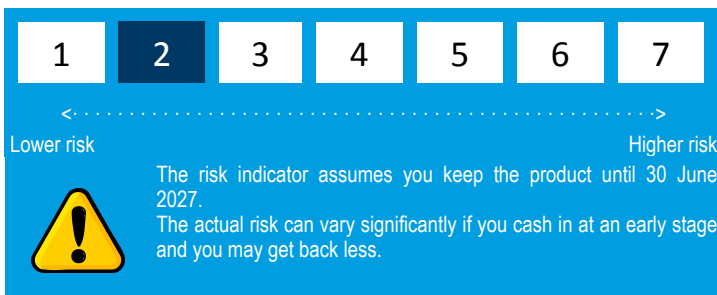

The product is aimed at retail investors who want to build up wealth and have an investment horizon until 30 June 2027.

These investors are willing to take a certain amount of risk for a potentially higher return and can bear losses under adverse conditions.

These investors are well-informed and experienced in investing.

## What are the risks and what could I get in return?

### Risk indicator

The summary risk indicator is a guide to the level of risk of this product compared to other products. It shows how likely it is that the product will lose money because of movements in the markets or because we are not able to pay you. We have classified this product as 2 out of 7, which is a low risk class.

2 indicates that this fund is one of the less risky among structured funds that have a fixed maturity date and no capital protection. The absence of capital protection increases the fund's sensitivity to the markets.

This product does not include any protection from future market performance so you could lose some or all of your investment.

If we are not able to pay you what is owed, you could lose your entire investment.

Moreover, an investment in this fund involves:

- a moderate level of inflation risk: there is no protection against an increase of the inflation.

There is no capital protection.

### Scenarios

The figures shown include all the costs of the product itself, but may not include all the costs that you pay to your advisor or distributor. The figures do not take into account your personal tax situation, which may also affect how much you get back.

What you will get from this product depends on future market performance. Market developments in the future are uncertain and cannot be accurately predicted.

The scenarios shown are illustrations based on results from the past and on certain assumptions. Markets could develop very differently in the future.

The stress scenario shows what you might get back in extreme market circumstances.

**Recommended holding period: Until the product is called or matures. This may be different in each scenario and is indicated in the table.**

Example Investment: 10 000 EUR		If you exit after 1 year	If you exit at call or maturity
<b>Scenarios</b>			
<b>Minimum</b>	<b>There is no minimum guaranteed return. You could lose some or all of your investment.</b>		
<b>Stress</b> <i>product ends after 3 years and 5 months</i>	<b>What you might get back after costs</b>	<b>7 812 EUR</b>	<b>4 442 EUR</b>
	Average return each year	-21.88%	-21.16%
<b>Unfavourable</b> <i>product ends after 5 months</i>	<b>What you might get back after costs</b>		<b>9 980 EUR</b>
	Percentage return		-0.20%
<b>Moderate</b> <i>product ends after 5 months</i>	<b>What you might get back after costs</b>		<b>9 980 EUR</b>
	Percentage return		-0.20%
<b>Favourable</b> <i>product ends after 5 months</i>	<b>What you might get back after costs</b>		<b>9 980 EUR</b>
	Percentage return		-0.20%

The performance scenarios are estimates based on minimum 10 000 price simulations of the underlying investments, taking into account the payoff structure of the fund/product. The price simulations are obtained by using the observed/historical returns of the underlyings (or of appropriate benchmarks and proxies) up until the maturity of the fund.

## What happens if KBC Asset Management NV is unable to pay out?

Because you invest directly in the fund, the failure of the Management Company, KBC Asset Management NV, to make distributions (for example, due to insolvency) would have no direct consequences on the ability of the fund to make distributions.

In the event that the fund itself fails to make distributions, you may lose your investment entirely. The fund is not covered by any compensation, guarantee scheme or any other form of investor guarantee.

## What are the costs?

The person advising on or selling you this product may charge you other costs. If so, this person will provide you with information about these costs and how they affect your investment.

### Costs over time

The tables show the amounts that are taken from your investment to cover different types of costs. These amounts depend on how much you invest and how long you hold the product. The amounts shown here are illustrations based on an example investment amount and different possible investment periods.

The duration of this product is uncertain as it may terminate at different times depending on how the market evolves. The amounts shown here consider two different scenarios (early call and maturity). In case you decide to exit before the product ends, exit costs may apply in addition to the amounts shown here.

We have assumed that a performance of the product that is consistent with each holding period is shown and 10 000 EUR is invested.

	If the product is called at the first possible date: 28 June 2024	If the product reaches maturity
<b>Total costs</b>	<b>392 EUR</b>	<b>701 EUR</b>
Annual cost impact (*)	3.9%	2.1% each year

(\*) This illustrates how costs reduce your return each year over the holding period. For example it shows that if you exit at maturity your average return per year is projected to be 1.8% before costs and -0.2% after costs.

We may share part of the costs with the person selling you the product to cover the services they provide to you. They will inform you of the amount.

These figures include the maximum distribution fee that the person selling you the product may charge: 2.5% of the amount invested. This person will inform you of the actual distribution fee.

### Composition of costs

One-off costs upon entry or exit		If you exit after 1 year
<b>Entry costs</b>	Max. 3.50% of the amount you pay in when entering this investment. This includes distribution costs of max. 2.50% of amount invested.	350 EUR
<b>Exit costs</b>	Max. 1.00% of your investment before it is paid out to you. We do not charge an exit fee for this product if you exit at maturity. On top of that an additional exit fee of max. 5.00% can be charged if you exit within one month after the entry.	100 EUR
<b>Ongoing costs taken each year</b>		
<b>Management fees and other administrative or operating costs</b>	1.01% of the value of your investment per year. This is an estimate based on actual costs over the last year.	101 EUR
<b>Transaction costs</b>	0.02% of the value of your investment per year. This is an estimate of the costs incurred when we buy and sell the underlying investments for the product. The actual amount will vary depending on how much we buy and sell.	2 EUR
<b>Incidental costs taken under specific conditions</b>		
<b>Performance fees</b>	There is no performance fee for this product.	0 EUR

## How long should I hold it and can I take my money out early?

### Recommended holding period: until 30 June 2027.

We recommend holding on to this product until it matures or is called. The investment policy aims to achieve the investment objectives on the fund's final maturity date or when it would be called earlier. The recommended holding period is based on the scenario where the fund is not called before maturity.

You can exit this product before the maturity of the fund but in that case the probability of getting less back than the initial investment is higher or when it would be called earlier. In case of a partial or full exit the exit costs mentioned in the "What are the costs?" section will be charged.

## How can I complain?

For complaints about the product or the conduct of the manufacturer or person selling or advising on the product, your intermediary is the first point of contact. If you cannot reach agreement, you can contact [klachten@kbc.be](mailto:klachten@kbc.be) Tel. 016/ 43 25 94, Brusselsesteenweg 100 3000 Leuven, or [gestiondesplaintes@cbc.be](mailto:gestiondesplaintes@cbc.be) Tel. 081 803 163, Avenue Albert I 5000 Namur or [ombudsman@ombudsfm.be](mailto:ombudsman@ombudsfm.be) Tel. 02 545 77 70, North Gate II, Koning Albert II-laan 8 bus 2 1000 Brussels. You can find the complete complaints procedure at [www.kbc.be/suggestion-or-complaint](http://www.kbc.be/suggestion-or-complaint) or [www.cbc.be/suggestion-ou-plainte](http://www.cbc.be/suggestion-ou-plainte). However, you always retain the right to initiate legal proceedings.

## Other relevant information

Detailed information on this product and the associated risks can be found in the documentation relating to the fund. Be sure to read this information before signing up. You can obtain the information free of charge from your intermediary.
